Dr.WEB®

Anti-virus for Mac OS X

Basic protection from viruses
and other malware targeting Mac OS X
and other operating systems

Dr.WEB®
Anti-virus for Mac OS X

Key features

- Scan of autorun objects; removable data storage devices; network and logical drives; e-mails; files; and directories, including archives
- Three types of scanning: express, full, and custom
- Automatic, manual, and scheduled scan
- Settings of SpIDer Guard® are password protected against unauthorized modification.
- Different actions can be performed with different types of objects: cure, move to the quarantine, delete; action sequences allow you to define which action will be applied to an object if the first action can't be performed
- User-defined file and path exclusions
- Detection and neutralization of viruses disguised with unknown packers.
- The anti-virus log contains the time of each event, the name of the scanned object, and the type of action applied to the object
- **NEW IN VERSION 10!** Dr.Web SpIDer Gate® — HTTP monitor for scanning HTTP-traffic and controlling Internet access
- **NEW IN VERSION 10!** Internet access control and protection from objectionable content (violence, gambling, etc.)
- Automatic (scheduled) and on-demand updating
- Virus notifications, including event sounds, for all viral events
- Quarantine to isolate infected files; quarantine storage time and maximum size can be specified. Curing, restoring, and removal of quarantined objects
- Detailed operation log
- Modules are available as command line utilities that can be used with Apple Scripts
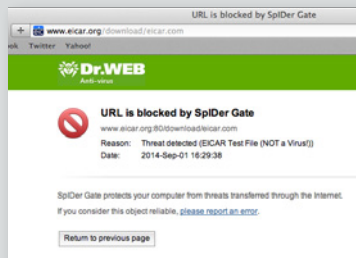

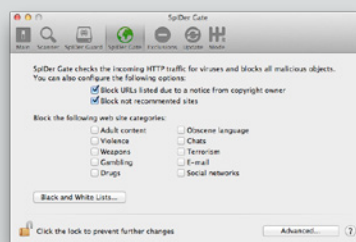

System requirements

- Mac OS X 10.7 and later
- RAM as per OS requirements
- Internet connection required to register and receive product updates.

License options

- Anti-virus
- Anti-virus + Control Center

Licensing
