Comprehensive protection for Windows, Mac OS X and Linux

Protection for mobile devices as a free gift!

Features (Windows)

- Comprehensive anti-virus security solution for your Windows PC.
- Real time protection.
- Installation and operation in an infected system and exceptional resistance to viruses.
- Efficient detection and neutralization of all types of threats
- Fast multi-thread scanning powered by multi-core systems
- Protection from latest malicious programs designed to bypass detection by traditional signature-based scan and heuristic analysis.
- Protection of data against corruption.
- Comprehensive analysis of packed threats
- Scan of archived files at any nesting level.
- Best detection and neutralization of complex viruses
- Filters spam and other types of unsolicited messages without training the anti-spam
- Real time scanning of traffic on all ports.
- With secure search, Google, Yandex, Yahoo!, Bing and Rambler will only return links to content considered safe by the search engines—unsafe content is filtered out by the search engines!
- Secure communication - instant messenger traffic filtering.
- Efficient protection of children against exposure to objectionable content
- Prevent unauthorized use of removable devices and the computer.
- Dr.Web Cloud – check URLs on Doctor Web's servers.
- Protects against unauthorized access by a network; prevents data leaks; blocks suspicious connections on package and application layers
- Remote administration from other computers in the local network without installing the Dr.Web Control Center.

System requirements

Dr.Web Security Space

- Windows 8/7/Vista (64-bit) and Windows 8/7/Vista/XP SP2 (32-bit).
- Free disk space: ~ 550 MB. Temporary Files created during installation will require additional disk space.

Dr.Web Anti-virus for Mac OS X

- Mac OS X 10.7 and later.
- RAM—as required by the OS.
- Internet connection for registration and updating.

Dr.Web Anti-virus for Linux

- Operating system: GNU/Linux distributions supporting Intel x86/amd64 with kernel 2.6.37 (and later) and glibc 2.13 (and later).
- At least 400 MB of free disk space.
- Internet connection for registration and updating.

Additional requirements: Internet connection for registration and updating.

Expand coverage free of charge for up to five PCs!

If your Dr.Web license expires in 3 months or sooner and you need to protect another computer or mobile device with Dr.Web, exchange your current license for an expanded one **FREE OF CHARGE**. An upgrade from Dr.Web Anti-virus to Dr.Web Security Space is also available for free. http://promotions.drweb.com/home_users/

The price includes updating of virus databases and software modules as well as technical support from Doctor Web. <http://support.drweb.com/>
