

Dr.WEB®

for MS Exchange

Defend what you create

Anti-virus and anti-spam
protection of mail traffic
directed through MS Exchange
2000/2003/2007 servers

© Doctor Web, 2010

Advantages

- Compliance with the highest security standards – the product is certified by Russia's Federal Security Service (FSB) and Federal Service for Technological and Export Control (FSTEC);
- Wide range of installation and configuration options that meet the requirements of almost any company;
- High-speed scanning combined with low consumption of system resources allows Dr.Web to run smoothly on any server hardware;
- The built-in anti-spam doesn't require training, lowers server workload and improves employee productivity;
- Filtering based on black and white lists allows certain addresses to be excluded from scanning and efficiency to be increased;
- Filtering of files by type, contributing to lower traffic;
- Grouping allows different filtering parameters to be specified for different groups of employees which contributes to faster deployment and easier maintenance;
- High performance and stability achieved with multi-thread scanning;
- Detection and neutralization of viruses disguised with unknown packers;
- Automatic launch on system start-up;
- Easy-to-use updating system using Windows Task Scheduler.

Key features

- On-the-fly anti-virus and anti-spam scan of e-mails, including attached files;

- Anti-virus protection of mail traffic passing through the MS Exchange server;
- Curing of infected files;
- Curing infected files;
- Adjustable scanning parameters: the maximum size and types of objects to be scanned objects, actions to be performed with infected objects;
- Adjustable scanning parameters: the maximum size and types of objects to be scanned, actions to be performed with infected objects;
- Customizable actions performed with different types of spam, including moving messages to the quarantine or adding a specified prefix into their subject fields;
- Customizable wording inserted in outgoing e-mails;
- Isolation of infected and suspicious files in the quarantine;
- Sending notifications on virus incidents to administrators and other users;
- Operation logging;
- Automatic updates.

System requirements

- Processor: Pentium 133 MHz, recommended -- Pentium 733 MHz
- RAM: 256 MB (512 MB recommended)
- Available space: 20 MB for Installation directory. It may also require 50 MB for logs and 500 MB for log archives.
- MS Exchange Server 2000/2003/2007.

Licensing

Types of licenses:

- Per number of protected users.
- Per server license – unlimited scanning of server e-mail traffic for as many as 3,000 protected users.

Dr.Web for MS Exchange can be purchased as a separate product or as a component of **Dr.Web Enterprise Security Suite**. In the latter case the license also covers the Control Center of Dr.Web Enterprise Security Suite and Anti-spam.

A **Dr.Web for MS Exchange** license may also include the SMTP proxy as an additional component. Using these products together improves overall network security and reduces the workload of local mail servers and workstations.

License options:

- Anti-virus
- Anti-virus + Control Center
- Anti-virus + SMTP proxy
- Anti-virus + Control Center + SMTP proxy
- Anti-virus + Anti-spam
- Anti-virus + Anti-spam + Control Center
- Anti-virus + Anti-spam + SMTP proxy
- Anti-virus + Anti-spam + Control Center + SMTP proxy

Dr.Web for MS Exchange is also included in low-cost bundles for small and medium companies.
