Anti-virus Pro

Protection components	Dr.Web Security Space Pro	Dr.Web Anti-virus Pro
Scanner ensures the highest rate of detection and fast scanning of autorun objects, removable data-storage devices, network and logical drives, e-mails, and files and directories (including archived files).	✓	✓
SpIDer Guard® ensures constant resource-efficient monitoring of file operations.	✓	✓
The **Anti-spy** blocks spyware, adware, riskware, paid dialers, and hacking and joke programs.	✓	✓
Anti-rootkit exposes rootkits lurking in the system.	✓	✓
SpIDer Mail® monitor scans e-mails transferred via SMTP/POP3/NNTP/IMAP4. Scan encrypted SSL-connections (SMTPS/POP3S/IMAP4S).	✓	✓
Microsoft® Office Outlook plugin detects viruses in attachments, scans e-mails transferred via an encrypted connection, filters out spam, and detects and neutralizes malware.	✓	✓ (without anti-spam)
Anti-spam detects spam and other unsolicited messages in any language with next to zero false positives.	✓	
SpIDer Gate® is an HTTP monitor that scans web pages in real-time and blocks phishing websites and other dangerous web resources. Scan encrypted SSL-connections (HTTPS).	✓	
Parental control blocks access to websites by keywords in their URLs and protects children from exposure to objectionable web content. You can restrict access to removable data-storage devices, files and directories to prevent unauthorized access or the deletion of important information.	✓	
New! The Dr.Web Cloud service checks URLs at-a-glance at Doctor Web servers (is used for the Parental control and SpIDer Gate HTTP monitor).	✓	
Firewall* is an impenetrable barrier to hackers attempting to break into your system.	✓	✓
With the **Anti-virus network component**, you can remotely control Dr.Web anti-viruses installed on computers connected to one local network without installing the Dr.Web Control Center.	✓	

* for Windows only

Other Dr.Web programs	Dr.Web Security Space Pro	Dr.Web Anti-virus Pro
Dr.Web Anti-virus for Mac OS X — Mac OS X 10.4 and later		✓
Dr.Web Anti-virus for Linux — GNU/Linux with the kernel 2.6.x		✓
