- Maximum Dr.Web protection for Windows, macOS, and Linux
- FREE protection for Android

- Subscribe for **1,65 €/month**
- Discounts for the quantity of devices in a subscription

Dr.Web will protect your digital WORLD

 <p>PROTECTION FOR ONLINE PAYMENTS</p> <p>Dr.Web will prevent hackers from penetrating your device when you're checking your account and making payments via online banking services; it will neutralise any banking Trojans and ransomware programs trying to launch on your device; and it will prevent keyloggers from being launched on your device and stealing your logins and passwords.</p>	 <p>PROTECTION AGAINST SCAMMERS</p> <p>Sometimes even caution won't help. But Dr.Web will filter out phishing emails—you simply won't see messages sent by criminals and you won't fall into their traps. It will prevent you from visiting fake online bank or store pages, and the sites of other fraudsters who are after your money.</p>	 <p>PROTECTION FOR CHILDREN ON THE INTERNET</p> <p>Parental Control will prevent children from visiting websites that can have disastrous psychological and moral impact; it will block children from accessing websites their parents deem inappropriate: social media sites, gambling sites, etc.; and it will give parents the ability to restrict the time their children spend on the Internet.</p>
 <p>RANSOMWARE PROTECTION</p> <p>Think you've got nothing that cybercriminals would want to steal? For one thing, they'd have no qualms about stealing your photos. Dr.Web prevents encryption ransomware from being launched in a system; this will protect users from blackmailers who demand a ransom for data or photo recovery — their attempts are doomed!</p>	 <p>ANTI-MINER PROTECTION</p> <p>Dr.Web protects computers against such break-ins and does not let cybercriminals use your system resources. Your computer will remain yours!</p>	 <p>PROTECTION AGAINST SPYING</p> <p>Do you often see annoying ads and get SMS spam? Congratulations — cybercriminals are spying on you. But, installed on your computer, Dr.Web will block hacker attempts to use your microphone or camera. You will be able to work without having to worry about your photos getting published on the Internet or the results of a meeting becoming known to your competitors.</p>

Protect your Android devices free of charge!

If you took out a subscription to Dr.Web Premium—just download the Dr.Web anti-virus to your Android devices.

A subscription = non-stop benefits

Thanks to **flexible subscription management options**, anti-virus protection has never been so beneficial for users.

- There's no need to worry about renewals. Your subscription is automatically renewed unless you suspend or terminate it.
- Going away on holiday? Put your Dr.Web anti-virus on holiday, too. Did your computer or smartphone break down? Suspend your subscription before handing your device over for repair so you aren't paying for a subscription you're not using.
- Monthly charging. Pay for any period, starting from 1 month — only for the actual number of connections.
