

Dr.WEB®

for Unix Server

Defend what you create

Anti-virus protection
for file storages

© Doctor Web, 2013

Dr.Web for Unix Server is a high performance anti-virus for Samba file storages run under Unix-like operating systems (Linux, FreeBSD, Solaris). With its ability to process huge amounts of data in real-time, reliable operation, and flexible configuration, Dr.Web for Unix Server meets the requirements of companies of any size.

Samba SpIDer is a file monitor for a Samba server. Implemented as a loadable plugin for a virtual file system (vfs), Samba interface, it also operates as a client communicating with Dr.Web Daemon and receives scanning requests.

Advantages

- High performance and stability;
- High-speed scanning combined with low consumption of system resources allows Dr.Web to run smoothly on any server hardware;
- Flexible, client-oriented configuration of scanning and actions performed with detected viruses or suspicious files;
- Perfect compatibility – the anti-virus doesn't conflict with any known firewall or file monitor;
- Easy administration, simple installation, and configuration.

System requirements

- Dr.Web Daemon (drwebd) 5.0 or higher
- Samba 3.0 or higher

Supported OS

- Linux distribution with kernel 2.4.x and later
- FreeBSD 6.x and later for Intel x86
- Solaris 10 for Intel x86

Key features

- On-demand and scheduled scanning of server volumes;
- On-the-fly scan –checks files for viruses as they are about to be written or opened;
- Multi-thread scan;
- Automatic disconnection of workstations from the server as soon as they've been identified as threat sources;
- Instant notifications for the administrators and their groups via e-mail, short messages sent to a phone, or pager;
- Isolation of infected files in the quarantine;
- Curing, restoration, and removal of quarantined objects;
- Anti-virus actions log;
- Automatic updating of virus databases.

Licensing

Types of licenses

- Per server license

License options

- Anti-virus
- Anti-virus + Control Center

Dr.Web for Unix server is also included in low-cost bundles for small and medium companies.
