

Dr.WEB®

Made in Russia

Dr.Web Gateway Security Suite

for Internet gateways Kerio

<https://www.drweb.com>

DEFEND WHAT YOU CREATE

Anti-virus scanning of traffic transmitted by the HTTP, FTP, SMTP, and POP3 protocols

- Included in the Register of Russian Computer Programs and Databases
- The only Russian anti-virus plugin for Kerio WinRoute / Control

All of a company's business processes depend on its mail system working flawlessly and being free of viruses and spam. A gateway is a company's first level of protection. Its entire business can depend on how well it copes with cyberattacks.

Dr.Web for Internet Gateways Kerio connects to the Kerio firewall and provides network traffic with reliable protection against all types of malware.

Advantages

- Reliably protects Internet connections for both home users and businesses of any type.
- Detects infected email attachments prior to their being processed by the mail server.
- Conveniently managed via the Kerio administration console.
- Minimal message scan time thanks to the use of multi-threaded scanning.

Key features

- Detects malicious objects transmitted by the HTTP, FTP, SMTP, and POP3 protocols, including unknown malicious objects.
- Customisable list of data-exchange protocols for scanning.
- Customisable actions for files that can't be scanned.
- In the custom scan mode, you can configure traffic-filtering settings, including the types of objects to be scanned and the actions that are to be performed with infected objects.
- Error and event log.
- Receive notifications on all virus events via email or as SMS messages.

Today, Dr.Web is the only Russian anti-virus plugin for Kerio WinRoute / Control, which is especially important when delivering the product to state enterprises.

Dr.Web for Internet gateways Kerio licensing

Types of licenses	License options
<ul style="list-style-type: none">▪ Per number of protected users▪ Per-server license▪ Unlimited license	<ul style="list-style-type: none">▪ Anti-virus▪ Anti-virus + Control Center <p>All licensing conditions: https://license.drweb.com/products/biz/</p>

! An Internet gateway is simply a service that is located on a standard file server. Therefore, you additionally need to protect the server itself and the channels that communicate with it.

When purchasing licenses to protect both an Internet gateway and a server, customers receive a **20% discount**.

Pre-sales support	Technical support
<ul style="list-style-type: none">▪ Free Dr.Web product testing.▪ Deployment, assistance during the implementation process — by phone or on site (in Moscow only).▪ Presentation, webinar, seminar.▪ Assistance with writing or verifying technical specifications.▪ Free training courses on the administration of Dr.Web products.	<ul style="list-style-type: none">▪ 24/7 by phone and via the web format at https://support.drweb.com.▪ Russian, English, German, French, and Japanese languages spoken.▪ The cost of support for ex-price and unlimited licenses is negotiated separately.▪ Paid VIP support.

Services

Dr.Web vxCube

- Intelligent and interactive cloud-based analyses of suspicious objects for viruses
- An immediately generated curing utility based on analysis results
- For security researchers and cybercrime investigators

In situations when a malicious file has penetrated a protected system or you have reason to believe that an "impostor" has infiltrated your infrastructure, the cloud-based interactive analyser Dr.Web vxCube is indispensable.

In one minute Dr.Web vxCube will assess how malicious a file is and provide you with a curing utility that will eliminate the effects of its activity. The examination takes from one to several minutes! Analysis results are provided in a report. Reports can be viewed in your Dr.Web vxCube account area or downloaded as archives.

If a file poses a threat, the user is instantly provided with a custom Dr.Web CureIt! build (if available under their license) that will neutralise the malware and undo any harm it has caused to the system.

This lets you disarm a new threat extremely quickly, without waiting for your anti-virus to eventually receive an update that would address it.

Thanks to its versatility, Dr.Web CureIt! can operate without being installed in any system where another (non-Dr.Web) anti-virus is in use; this may particularly come in handy for companies that haven't yet chosen Dr.Web to be their primary means of protection.

Anti-virus research

Malware analysis by Doctor Web security researchers

No automated routine can ever replace the experience and knowledge of a security researcher. If Dr.Web vxCube returns a "safe" verdict on your analysed file, but you still have your doubts about this result, Doctor Web's security researchers, who have a wealth of experience analysing malware, are ready to assist you.

With this service, a malicious file of any complexity can be analysed. The resulting report includes:

- Information about the malware's basic principles of operation and that of its modules;
- An object assessment: downright malicious, potentially dangerous (suspicious), etc.;
- An analysis of the malware's networking features and the location of its command and control servers;
- The impact on the infected system and recommendations on how the threat can be neutralised.

You can submit an anti-virus research request here: <https://support.drweb.com>.

Virus-related computer incident (VCI) expert consultations

If malware has wreaked havoc in your corporate infrastructure and you require the expertise of security researchers to investigate the incident, Doctor Web's information security task force is at your service.
