DEFEND WHAT YOU CREATE

A migration programme for users who want to switch from their anti-virus to Dr.Web for business

- 50% off
- Or 2 years of protection for the price of 1
- Free protection for the time remaining on the non-Dr.Web license

## Switch to Green

1. This special offer concerns Dr.Web [products](#) only. Bundles, utilities, appliances, services and solutions are not part of the migration programme.
2. This offer is for corporate customers only. It is available only to organisations and companies, and only once.
3. The migration discount is not available to users of OEM licenses.
4. Customers migrating to a one-year Dr.Web license receive a 50% discount. Customers migrating to a two- or three-year license pay 1 and 1.5 times the price of a one-year Dr.Web license, respectively.
5. The migration discount applies only when customers are switching to a Dr.Web anti-virus product that is similar to the one they have been using (one of the same type and protecting the same number of objects).
6. In order to receive a migration discount, the user must provide their original license, key file, or a confirmation e-mail proving that they purchased an electronic license from another vendor and the registration information.
7. Users of valid and expired licenses can receive the discount provided that they have contacted a Doctor Web partner within 30 days of their license's expiration.
8. If the license purchased from the other vendor is still valid when the customer purchases a Dr.Web license, the time remaining on that license will be added to the term of the Dr.Web license free of charge.
9. When a license obtained through the migration programme is subsequently renewed, the normal renewal discount applies.
10. Migration discounts cannot be combined with any other discounts.

## About Doctor Web

Doctor Web is the Russian developer of Dr.Web anti-virus software. Dr.Web anti-virus software has been developed since 1992. It was one of the world's first anti-viruses.

The company is a key player on the Russian market for software that meets the fundamental need of any business — information security. Our anti-virus protection system allows the information systems of our customers to be protected from any threat, even those still unknown.

Doctor Web has received state certificates and awards; our satisfied customers spanning the globe are clear evidence that the quality of our products, created by a talented team of Russian programmers, is undisputed.
