

Defend what you create

How do you save on an Anti-virus and get time added to your license for free?

Migrate to Dr.Web: Switch to Green!

At times a company's information security tools fall short when dealing with real-world demands. An anti-virus may fail to neutralize the most up-to-the-minute threats. And because of poor usability, the services of a highly paid administrator may be needed. On top of that, the cost of a license can be substantial.

If a company decides to replace its anti-virus software, switching to a new solution can be a problem. It takes time and money to deploy the new product in the network. Meanwhile the company probably lost money on the old product due to up-front costs and security breaches.

Let us solve your problem with our low-cost Dr.Web migration program —“Switch to Green”! Free license time and substantial savings! What more could you ask for?

Switch for 1 year and save	Switch for 2 years and save even more!	Benefit from bonuses!
50% discount	1 year of protection free	<ul style="list-style-type: none"> Free license for the remaining period of your old anti-virus license* Use Dr.Web CureNet! free of charge Use Dr.Web CureIt! free of charge

* If when you purchase a Dr.Web license you still have time remaining on a different license, we will increase—for FREE—the term of your Dr.Web license by however many days are remaining on the other license.

How can you “Switch to Green”?

When purchasing your Dr.Web “Switch to Green” migration license, present the anti-virus license you bought from another vendor.
