

Dr.WEB®

for Internet Gateways Unix

Defend what you create

Anti-virus scan of the HTTP and
FTP traffic on a corporate Internet
gateway — proxy-server

© Doctor Web, 2013

Advantages

- A wide range of options for establishing comprehensive protection from threats lurking in inbound Web traffic;
- Delivery of virus-free content into the protected network;
- Efficient filtering of traffic by the ICAP server doesn't delay content delivery;
- Protection from penetration of the defence by any type of malware;
- High scalability;
- Ability to process huge amounts of data in real-time;
- Substantial reduction of Internet costs;
- Perfect compatibility – integration with any application supporting ICAP, with all known firewalls;
- Support of virtually all Unix-based operating systems currently in use;
- Low system requirements allow the product to run smoothly on any server hardware;
- Flexibility and easy administration; the product lets you implement protection configurations that are in compliance with your company's security policies.

Key features

- Anti-virus scan of HTTP and FTP traffic;
- Centralized administration over the Dr.Web Enterprise Security Suite Control Center's Web administrator;
- Filtering by host name, MIME type, or file size;
- Web resources access control;
- Preview technology for optimized traffic scanning;
- Support of IPv4 and IPv6;
- Application of various actions to different types of scanned files;
- Isolation of infected files in the quarantine;
- Easy-to-read reports;
- Centralized administration of protection servers and collection of reports from the servers;
- Simultaneous processing of several requests per individual connection;
- Protection from unauthorized access;
- Monitoring of the system's operation and automatic restoration after a failure;
- User notifications about the presence of viruses or other malicious code in web-pages.

Supported OS

- Linux with kernel 2.4.x and higher
- FreeBSD 6.x and later (Intel x86)
- Solaris 10 (Intel x86)

Any proxy server with the full support of ICAP such as:

- Squid 3.0 or later
- SafeSquid 3.0 or later

Licensing

Types of licenses:

- Per number of protected users.
- Per server license – unlimited scanning of server traffic for as many as 3,000 protected users.

License options:

- Anti-virus
- Anti-virus + Control Center

Dr.Web for Internet Gateways Unix is also available in Dr.Web bundles for small and medium companies.

Doctor Web

Doctor Web is a Russian anti-virus vendor with a software development record dating back to 1992.
